

## Redmine - Feature #11300

### Update issue - form position

2012-07-01 23:30 - # And

<b>Status:</b> Closed	<b>Start date:</b>
<b>Priority:</b> Normal	<b>Due date:</b>

<b>Category:</b> Issues	<b>Estimated time:</b> 0.00 hour
<b>Target version:</b>	
<b>Resolution:</b> Duplicate	
<b>Description</b> I personally use "Reverse chronological order", so latest updates are top located. It is very inconvenient to get a update form at bottom, while latest update in top.  Is this issue but or feature?	
<b>Related issues:</b> Copied to Redmine - Patch #12524: Update issue - form position <span style="float: right;"><b>Closed</b></span>

Hey, anyone? =)

#### #2 - 2012-08-16 00:10 - # And

I resolve it myself. Add, please, code to repository:

```
<script type="text/javascript">
  (function(){
    var reverseOrder = <%= User.current.wants_comments_in_reverse_order? %>,
        historyElement = $('history'),
        updateElement = $('update');

    if (reverseOrder && historyElement) {
      // Add br-element at bottom of update for to simulate some margin from journals
      updateElement.insert({ bottom: new Element('br') });

      // Inject before journals
      historyElement.insert({ before: updateElement });
    }
  })();
</script>
```

#### #3 - 2012-08-16 00:17 - # And

Here it code update.

```
<script type="text/javascript">
  (function(){
    var reverseOrder = <%= User.current.wants_comments_in_reverse_order? %>,
        historyElement = $('history'),
        updateElement = $('update');

    if (reverseOrder && historyElement) {
      // Add br-element at bottom of update for to simulate some margin from journals
      // and apply css-clear-property to break some long commit lists
      updateElement.insert({ bottom: new Element('br') }).setStyle({ clear: 'both' });

      // Inject before journals
      historyElement.insert({ before: updateElement });
    }
  })();
</script>
```

```
})();  
</script>
```

**#4 - 2012-09-30 22:57 - # And**

- *File form\_position.patch added*

Added patch to Redmine 2.1.0.

**#5 - 2012-12-06 15:35 - # And**

- *Status changed from New to Resolved*

Moved to [#12524](#)

**#6 - 2013-10-31 14:39 - Etienne Massip**

- *Status changed from Resolved to New*

- *Assignee deleted (Jean-Philippe Lang)*

I don't think this should be done using JavaScript?

**#7 - 2013-11-01 16:32 - # And**

Actually, yes. I just don't know Ruby syntax, that's why I used JS.

**#8 - 2016-05-09 07:56 - Go MAEDA**

- *Status changed from New to Closed*

- *Resolution set to Duplicate*

Closing as a duplicate of [#12524](#).
