

Redmine - Defect #11772

Multiple parent task - maybe bug?

2012-09-04 13:54 - Zsófi Major

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Issues	Estimated time:	0.00 hour
Target version:		Affected version:	1.1.0
Resolution:	Duplicate		
Description			
<p>A strange bug came up yesterday, and I would love to hear a solution for that...</p> <p>I created a lot of tickets a few weeks ago, then I realized I should create a parent task to it to gather everything in the same place.</p> <p>I added the number of the parent task to each of the tickets, then somehow all the tickets got messed up. Some of them has more than one parent task (see attached screenshot), however I added only one number there (don't know anyway how I could add more, but I guess these are the parent tasks of the parent tasks).</p> <p>When I started to follow up the tickets (to find the source of it), I found that there are tickets which are parent tickets to each other... I also tried to delete the parent task number of each ticket, but I got back the following error msg: 'Internal error</p> <p>An error occurred on the page you were trying to access. If you continue to experience problems please contact your redMine administrator for assistance.'</p> <p>I would be grateful if you could give me ideas how I can fix this. Thanks.</p>

- Status changed from New to Resolved

Hi there,

just found the solution.

The related ticket is <http://www.redmine.org/issues/6579>

I close the issue.

Bests,
Zsófi
