

Redmine - Patch #11818

Redmine.pm fails when permissions are NULL

2012-09-11 23:46 - John Yani

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:	Jean-Philippe Lang	% Done:	0%
Category:	SCM extra	Estimated time:	0.00 hour
Target version:	2.1.0		
Description			
Steps to reproduce:			
1) Setup SVN access using this guid http://www.redmine.org/projects/redmine/wiki/Repositories_access_control_with_apache_mod_dav_svn_and_mod_perl			
2) Create a public project "FOO" and a corresponding svn repo			
3) Remove all permissions from anonymous user			
4) Add user "BAR" as a member of "FOO" project with read svn permissions			
5) Execute this SQL query:			
<pre>SELECT hashed_password, salt, auth_source_id, permissions FROM projects, users, roles WHERE users.login='BAR' AND projects.identifier='FOO' AND users.status=1 AND (roles.id IN (SELECT member_roles.role_id FROM members, member_roles WHERE members.user_id = users.id AND members.project_id = projects.id AND members.id = member_roles.member_id) OR (roles.builtin=1 AND cast(projects.is_public as CHAR) IN ('t', '1') AND));</pre>			
6) Login to http://svn_server/FOO using user "BAR" credentials			
Expected behavior:			
1) result of query in step 5 has 1 line with non-null permissions			
2) I can browse svn via browser			
Actual behavior:			
1) result of query in step 5 has 2 lines one of which has null permissions			
2) I see error 500 in the browser			
A patch to fix this problem is attached
