

Redmine - Patch #12078

User#allowed_to? should return true or false

2012-10-11 16:31 - Anonymous

Status:	Closed	Start date:	
Priority:	Low	Due date:	
Assignee:	Jean-Philippe Lang	% Done:	0%
Category:	Code cleanup/refactoring	Estimated time:	0.00 hour
Target version:	2.2.0		
Description			
The attached patch fixes a minor bug in User.allowed_to?			
Specifically, that method should return a boolean, but it actually sometimes returns a Role instead. This is because .detect is used when really .any? should be used.			
I am not aware of this causing any serious issues, but I noticed this during debugging and was greatly confused when allowed_to? suddenly returned a Role ;).			

Associated revisions

Revision 10614 - 2012-10-12 11:12 - Jean-Philippe Lang

Fixed that User#allowed_to? should return true or false (#12078).

History

#1 - 2012-10-11 17:30 - Etienne Massip

- Category set to Code cleanup/refactoring

#2 - 2012-10-12 11:13 - Jean-Philippe Lang

- Subject changed from Replace incorrect uses of .detect by .any? to User#allowed_to? should return true or false

- Status changed from New to Closed

- Assignee set to Jean-Philippe Lang

- Target version set to 2.2.0

Committed in [r10614](#). Another change was required so that User#allowed_to? return true or false and tests were updated.
