

Redmine - Feature #1221

user should have permissions which can edit/delete the messages posted by himself

Description			
I have found user can not edit/delete the messages posted by himself in forums. Currently the permission system do not provide some way to news/documents/messages editable by the author. I think its useful to add some local/author role system.			

History

#1 - 2013-03-17 08:20 - Ivan Cenov

Nowadays this is implemented:

Forums

- Manage forums
- Post messages
- Edit messages
- Edit own messages
- Delete messages
- Delete own messages

#2 - 2013-03-17 09:51 - Daniel Felix

- Status changed from New to Closed

Confirmed. This could be closed. Thanks for the check.
