

Redmine - Feature #12230

Make format help translateable

2012-10-27 20:32 - Daniel Felix

- Related to Feature #14630: wiki_syntax.html per language (wiki help localization mechanism) added

#2 - 2013-08-08 16:41 - Daniel Felix

This could be resolved after closing of [#14630](#). Normally 14630 would duplicate this, but as 14630 is already committed, I let this issue open until everything is done. :-)
