

Redmine - Feature #1240

Allow changing order of project versions

2008-05-15 10:32 - Viktor Kuzmin

Description It will be good to have possibility to change order of project versions. For example, we're working on version 2.0, but there is need to create version 1.6 and i'd like to see it before 2.0.	

History

The versions are ordered by their due date, and in our project we commonly find that this is putting the most relevant version at the top of the list :)

Is this a valid option in your project?

Seems that this was my misunderstanding - I had not specified dates for the versions. Sorting by due date is enough. Thanks.

User misunderstanding.
