

Redmine - Feature #12401

Split "Manage documents" permission into create, edit and delete permissions

2012-11-19 21:43 - Michael Esemplare

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:	Jean-Philippe Lang	% Done:	0%
Category:	Documents	Estimated time:	0.00 hour
Target version:	2.3.0		
Resolution:	Fixed		
Description Due to security reasons we needed to expand the "Manage Documents" permission to allow specific settings per role. I am pushing back my changes in patch form as a feature for Redmine.

Sound intesting.
So which new rights did you add?

#2 - 2012-11-20 00:03 - Michael Esemplare

Instead of "Manage Documents" which was too abstract for our purposes, I separated the permissions into "Add Documents", "Edit Documents", and "Delete Documents". I also left the "View Documents" permission in place.

Perfect!

+1

It worked perfectly!

However, I'm also a need permission by document type. Very difficult?

#5 - 2012-11-26 21:30 - Jean-Philippe Lang

- Subject changed from Enhanced Documents permission to Split "Manage documents" permission into create, edit and delete permissions
- Category changed from Permissions and roles to Documents
- Target version set to 2.3.0

#6 - 2012-12-16 11:36 - Abdul Halim Mat Ali

We need this for the file permission too

At 2.2.0 version a "private" comment type was added, but if you attach any document to this "private" comment its available to everyone. If a "private" status will be applied to uploaded document as well. That would be super.
