Description

While using the Roles REST API, I encountered a bogus issue with authentication while the global setting "Authentication required" was on : I could not fetch /roles.{json|xml}, I always got a 401 whatever auth I tried (cookie, plain, header).

The following patch against SVN trunk should fix it, at least it works correctly now for me :

In 2.1-stable and 1.4-stable, "accept_api_auth" is duplicates.
Is it correct?
[source:branches/2.1-stable/app/controllers/roles_controller.rb@10895#L24](#)

```
  accept_api_auth :index
  accept_api_auth :index, :show
```

#4 - 2012-11-30 11:18 - Toshi MARUYAMA

RolesController#show added at trunk [r10620](#).
1.4-stable and 2.1-stable don't have RolesController#show.
