<b>Target version:</b>	2.2.0		
<b>Description</b>			
Hello.			
This korean translation patch is for <a href="#">r10952</a> (in the 2.2-stable branch) and also for <a href="#">r10998</a> (current trunk). I wish this patch could be applied into the redmine 2.2.0 version, which is going to be released soon.			
The update consists of refining some awkward translations and introducing new translations:			
<ul style="list-style-type: none"><li>• fix awkward translation for 'commit', 'tag', and 'branch' : <code>commit</code>, <code>tag</code>, <code>branch</code></li><li>• fix translation for 'duplicates' and 'duplicated by' : <code>duplicates</code>, <code>duplicated by</code></li><li>• fix translation for 'issue watchers' to '<code>issue watchers</code>'</li><li>• some new translations on fields, workflow and archiving projects</li><li>• other minor &amp; trivial fixes</li></ul>			
Thank you.
