

Redmine - Defect #12648

Multiple levels of nested subtasks not displayed correctly in issue list

2012-12-19 14:46 - Mike Jackson

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Issues	Estimated time:	0.00 hour
Target version:		Affected version:	2.2.0
Resolution:	Duplicate		

Description

Note that 2.2.0 is not included in the "Affected version" dropdown. I have selected "dev" in its place.

See attached screenshots. Subtasks are not shown correctly in the issues list if they are nested more than one level below the parent issue. In this instance, the nesting should be displayed as 35 -> 31 -> 37. However, in the issue list, the 35 -> 31 nesting is shown, but 37 is shown as its own issue, not a subtask of any other issue.

```
[redmine@web1a.ops.ord1a redmine-2.2.0]$ RAILS_ENV=production rake about
```

About your application's environment

Ruby version 1.9.3 (x86_64-linux)

Is duplicate of Redmine - Feature #7907: Display Issues in a hierarchy (tree) **New** **2011-03-17**

History

#1 - 2012-12-19 16:17 - Daniel Felix

This is some CSS related issue. There is just one css class "child". Maybe this could be solved by adding a hierachical level to this child-class.

#2 - 2013-01-16 09:58 - Daniel Felix

- Affected version (unused) changed from devel to 2.2.0

- Affected version set to 2.2.0

Updated affected version.

Any news on this? What do you think about those hierachical class?

#3 - 2013-03-26 17:28 - Dipan Mehta

Is this related to [#10048](#) and/or [#7417](#) ?

#4 - 2013-03-27 06:26 - Toshi MARUYAMA

- Status changed from New to Closed

- Resolution set to Duplicate

Duplicate with [#7907](#).
