Target version:	2.3.0		
Resolution:	Fixed	**Affected version:**	2.2.0

Description

This issue is possibly related to [#2550](#2550).

I configured a project A and assigned tracker XYZ. I then created a subproject B where I disabled the issue module. The overview page of project A now displays all trackers even though I haven't assigned them to A. This is because they are assigned to B, although the issue module is disabled.

Workaround: I had to enable the issue module in B, remove all trackers from B and then disable the issue module again.

Associated revisions

Revision 11336 - 2013-02-09 14:56 - Jean-Philippe Lang

Fixed that project overview page shows trackers from subprojects with disabled issue module (#13076).
