

## Redmine - Feature #1308

use ajax suggestion pattern to fill out single potentially big fields, like "assigned to", "author"

2008-05-26 20:49 - rupert thurner

<b>Status:</b> New	<b>Start date:</b> 2008-05-26
<b>Priority:</b> Normal	<b>Due date:</b>
<b>Assignee:</b>	<b>% Done:</b> 0%
<b>Category:</b> UI	<b>Estimated time:</b> 0.00 hour
<b>Target version:</b>	
<b>Resolution:</b>	
<b>Description</b> if the user base is large, it would be nice not to have dropdown for them, but something like <a href="http://ajaxpatterns.org/Suggestion">http://ajaxpatterns.org/Suggestion</a> . an example copied from the patterns page is google suggest: <a href="http://www.google.com/webhp?complete=1">http://www.google.com/webhp?complete=1</a> .

### History

#### #1 - 2008-05-26 20:58 - rupert thurner

this: <http://www.interiders.com/wp-content/demos/ProtoMultiSelect/test.html> would be also an example for multiselect.

#### #2 - 2008-05-26 21:17 - rupert thurner

this would maybe usable for: \* categories (one issue can have multiple categories) \* related to (as there are a lot of issues)

#### #3 - 2008-06-20 17:12 - Mark Gallop

- File *issues\_controller.rb.diff* added

- File *\_user\_search.rhtml* added

- File *\_form.rhtml.diff* added

I also needed to do this as my Redmine install needs 2000+ users.

Attached are some patches/files for a method I am using for creating an ajax search box for selecting the author of an issue. Although this is not something that would be needed in Redmine core, it might be a base for adding the feature when the lists would be too large for a combobox.

This patch requires the Rails auto\_complete plugin.
