

Redmine - Feature #13111

New setting to include the status changes in issue mail notifications subject

2013-02-08 23:12 - Francewhoa (Francois Carpentier)

Status:	Closed	Start date:	2008-02-04
Priority:	Normal	Due date:	
Assignee:	Go MAEDA	% Done:	0%
Category:	Email notifications	Estimated time:	0.00 hour
Target version:	4.1.0		
Resolution:	Fixed		
Description			
Note: I searched but could find how to re-open an issue at #603 . So I'm creating this new one.			
Ideally, the subject would just contain:			
[the project name, the tracker, the issue #], status and the subject of the issue.			
No " status ". This is useful because it allows email clients to thread all emails relating to a single issue together. " status " is already included in the email notification body so it's a duplicate any way.			
Current subject line don't work with clients like Gmail. Reply from Gmail: " A conversation will break off into a new thread if the subject line of the conversation is changed " Source: http://support.google.com/mail/bin/answer.py?hl=en&answer=5900 The subject line change because the " status " change.			
I would be happy to contribute testing :) Any volunteer for a patch?

Associated revisions

Revision 17907 - 2019-02-28 09:23 - Go MAEDA

New setting to include the status changes in issue mail notifications subject (#13111).

Patch by Marius BALTEANU.

Revision 17922 - 2019-03-04 09:56 - Go MAEDA

Update locales (#13111, #30838).

Revision 18134 - 2019-05-07 01:34 - Go MAEDA

Fix tests to test Mailer.deliver_issue_edit instead of Mailer.deliver_issue_add (#13111, #31065).

Patch by Mizuki ISHIKAWA.

History

#1 - 2013-02-10 11:57 - Jan Niggemann (redmine.org team member)

IIRC it's the same with Lotus notes / Domino...

#2 - 2013-06-11 09:36 - Sergejs Degtjars

vote for this.

MS Outlook grouping also doesn't work with different subjects.

#3 - 2013-07-11 15:12 - Jongwook Choi

Just for a reference: [#1401](#) does not work for gmail as of now.

For temporary monkey-patching, so that the mail subject does NOT contain status names, one can modify the 48th and 69th line of "app/models/mailer.rb" as follows:

```
@@ -48,1 +48,1 @@
-       :subject => "[#{issue.project.name} - #{issue.tracker.name} ##{issue.id}] (#{issue.status.name}) #{issue.subject}"
+       :subject => "[#{issue.project.name} - #{issue.tracker.name} ##{issue.id}] #{issue.subject}"

@@ -69,1 +69,0 @@
-       s << "(#{issue.status.name}) " if journal.new_value_for('status_id')
```

I think it would be great if this behaviour can be configured in the application settings, just as different ways of displaying user names (USER_FORMATS in app/models/user.rb).
Hope I could work on this patch when I get time later...

#4 - 2014-07-07 09:50 - Peter Volkov

This is very close to [#3660](#). Probably it's better to implement [#3660](#) and fix this in one go.

#5 - 2014-07-07 09:51 - Peter Volkov

As for emails grouping in gmail, I found this blog post useful:
<http://www.sensefulsolutions.com/2010/08/how-does-email-threading-work-in-gmail.html>

#6 - 2014-08-05 16:03 - Toshi MARUYAMA

- Related to Feature [#3660](#): Configurable subject of notification email for issue_add/issue_edit added

#7 - 2018-11-07 22:06 - Hashem Nasarat

I disagree Peter Volkov; this is a longstanding usability issue; and if the fix is simply to remove a field from the email template that should not be blocked on a further enhancement.

If the maintainers agree this is reasonable I'll try to prepare a patch.

#8 - 2019-02-17 23:11 - Marius BĂLTEANU

Gmail is one of the most used email clients and I think it should be very nice to support email threading. The rule is simple, the subject of the email must be the same.

Go Maeda, do you think that we should do this configurable (ex: Show issue status in email notifications for issues) or we should just remove the status from the subject? IMO, I never found the status information from the subject useful.

#9 - 2019-02-18 02:54 - Go MAEDA

I prefer making the subject line configurable rather than simply removing the status. The information that the status has been changed is useful for me.

I will try the patch in [#17096#note-19](#) on my environment and check if the threading issue will be resolved.

Thanks, I'll prepare a patch.

I will try the patch in [#17096#note-19](#) on my environment and check if the threading issue will be resolved.

For Gmail won't work because the rule for threading uses only the subject, but I'm curious if it'll fix the problem on Exchange/Office365.

I have just confirmed that patch [#17096#note-19](#) has no effect on Gmail. Unfortunately, I cannot test Exchange/Office365.

#12 - 2019-02-19 23:00 - Marius BĂLTEANU

- File *0001-New-setting-to-include-the-status-changes-in-issue-m.patch* added

Thanks, I'll prepare a patch.

Attached the patch that adds a new setting to include the status changes in issue mail notifications subject.

The setting is useful to control the grouping of mails on some mail clients (Gmail for example).
By default, the setting is enabled to not change the current behaviour.

new_setting.png

#13 - 2019-02-19 23:04 - Marius BĂLTEANU

- File *new_setting.png* added

#14 - 2019-02-19 23:18 - Marius BĂLTEANU

- File *office365.png* added

- File *gmail.png* added

- Target version set to *Candidate* for next major release

I can confirm that applying the patch on the current trunk fixes the thread issues on both major mail platforms:

1. Office 365
office365.png

2. Gmail
gmail.png

Most probably, for Office 365 is not only the proposed patch, but also a fix available only on the current trunk.

#15 - 2019-02-19 23:25 - Marius BĂLTEANU

- Related to Defect *#17096: Issue emails cannot be threaded by some mailers due to inconsistent Message-ID and References field* added

#16 - 2019-02-19 23:28 - Marius BĂLTEANU

- Related to Patch *#13658: include "In-Reply-To" field to aid email threading for some clients* added

#17 - 2019-02-20 00:57 - Go MAEDA

- Has duplicate Feature *#13083: Ticket status on email subject* added

#18 - 2019-02-20 02:00 - Go MAEDA

Marius, thank you for the patch. The patch works fine but I have one suggestion.

How about storing the setting value as an Array instead of an integer value, like *Setting.notified_events*? It is useful when we make the subject line more configurable in the future. For example, we may add a setting to show/hide a project name or tracker name.

#19 - 2019-02-20 08:36 - Marius BĂLTEANU

Go MAEDA wrote:

I prefer to do a migration at that moment (it won't be a big deal) because we don't know (or at least me) how this feature will develop in the future. I see at least 3 options :) But if you really want to store it as Array, I can change my patch.

#20 - 2019-02-20 08:53 - Go MAEDA

Marius BALTEANU wrote:

It makes sense.

#21 - 2019-02-26 09:57 - Go MAEDA

- Target version changed from Candidate for next major release to 4.1.0

#22 - 2019-02-28 09:25 - Go MAEDA

- Status changed from New to Closed
- Assignee set to Go MAEDA
- Resolution set to Fixed

Committed the patch. Thank you for improving Redmine.

#23 - 2019-02-28 09:42 - Go MAEDA

- Subject changed from Don't include new status for issues in email subject to New setting to include the status changes in issue mail notifications subject

#24 - 2019-03-21 13:27 - Go MAEDA

- Related to Patch #31065: Fix tests that has incorrect verification target added
