Target version:	5.0.0	Affected version:	2.1.2
Resolution:	Fixed		
Description			
When viewing a project's list of members, if an entry is not deletable, the "Edit" command is not aligned with "Edit" commands in other entries where both "Edit" and "Delete" are available.			
An example of an undeletable entry is a user who belongs to the project members in addition to being a member in a group that also belongs to the project members.

When a group is a member in a project, users on that group are automatically listed along with the group in the project members view. Therefore, I should've phrased the above more accurately as follows:

An example of an undeletable entry is a user who is a member in a group that belongs to the project members.

- Priority changed from Low to Normal

I extracted a patch 0002-Separate-delete-link-and-edit-link-columns.patch from [#36376#note-1](#) and slightly updated not to change the HTML structure. The original patch was written by [Mizuki ISHIKAWA](#).

Setting the target version to 5.0.0.
