Description			
Hi,			
I just discovered that GETting an URL which points to a topic of a forum that does not exist causes an error 500. I could reproduce it by the following steps:			
<ol style="list-style-type: none">1. Create a new project with forums enabled (optional)2. Create a new forum3. Create a new topic, remember the GET url4. Delete the forum5. GET the remembered url			
The stack trace says:
