Database adapter mysql2
Database schema version 20130217094251

version: [r11458](#)

I used rdm-mailhandler.rb to create a user automatically and create an issue on my 'unassigned' project. The created user has no groups or projects.

The non-member role has issues visibility of 'issues created by or assigned to the user'. (that was added in [#7412](#) / [r5416](#)). The other permissions on the non-member role are: 'View Issues' and 'Add notes'.

a) After updating an issue there's no email notification to the user when their email notification is set to:

- watched or involved or
- only things I'm the owner of
(related issues [#6069](#) and [#8497](#))

When logged in as the new users

b) /activity
Shows nothing

c) /issues
shows nothing

d) /my/page
shows nothing

e) /issues/3027
Direct access to the issue created by the user - 403 You are not authorized to access this page.

After creating a NONMEMBER role with the same permissions / issues visibility as the internal non-member role, and assigning the role 'NONMEMBER' on project 'unassigned' for the user, all of the above are visible and notices are sent.

History

#1 - 2013-03-01 11:50 - Jean-Philippe Lang

- Status changed from New to Needs feedback

Works for me. Is your 'unassigned' project public or private?

#2 - 2013-03-01 23:31 - Daniel Black

private.

#3 - 2013-03-02 10:50 - Jean-Philippe Lang

- Subject changed from non-member role issue visibility 'created by or assigned to the user' unable to view own issues / or receive email notification of own issues to Non-member role with 'created by or assigned' issue visibility can't view own issues in private project

- Status changed from Needs feedback to Closed

- Resolution set to Invalid

Thanks but I'll have to close this one. Private projects are never visible to non-members.

#4 - 2013-03-03 07:56 - Daniel Black

ok. Thanks for your help.

patch [#13340](#) is my work around. Hope this is acceptable.
