Redmine - Feature #13298

Grouping issue history (activity) in issue history tabs

2013-02-26 19:43 - Pavel Lautsevich

Status:	Closed	**Start date:**	
Priority:	Normal	**Due date:**	
Assignee:		**% Done:**	0%
Category:	Issues	**Estimated time:**	0.00 hour
Target version:			
Resolution:	Duplicate		

Description

It would be very useful if the activity on the task grouped by type: comments, status changes and etc., like in the Jira.

I like it the way it is because you have everything on a consistent timeline.
With your solution, I have to switch back and forth between, say, comments and status changes to know in which order they took place...

#2 - 2013-02-26 21:24 - Pavel Lautsevich

The system must remember the user's choice and display the corresponding tab.

#3 - 2013-02-26 23:50 - Toshi MARUYAMA

- Category changed from UI to Activity view

#4 - 2013-02-27 04:24 - Mischa The Evil

- Subject changed from Grouping task activity log to Grouping issue history (activity) in issue history tabs

- Category changed from Activity view to Issues

Toshi MARUYAMA wrote:

- **Category** changed from *UI* to *Activity view*

This request is not about the activity view (it is actually about source:/trunk/app/views/issues/_history.html.erb).
Looking at the screenshot Pavel is requesting a way to display the (Redmine) issue history (aka issue notes aka issue comments) like it is done in Jira where the issue activity is displayed divided over several tabs (see e.g. https://confluence.atlassian.com/display/JIRA052/Viewing+an+Issue's+Change+History).
An old plugin, Redmine Issue History Tabs Plugin, implemented something a bit similar, but divided the issue history (aka ...) over only two tabs: *All* and *Comments*. I noticed that some 2.x compatible forks seem to exist on GitHub though nowadays.

That shouldn't be a problem with such feature, I think. That case should be covered by the/an *All* tab which needs to show *all* issue history in the order in which it took place (like as it is now also the default in Redmine).

#5 - 2013-02-27 04:28 - Mischa The Evil

- Description updated

Adjusting width of screenshot.

I don't know JIRA but with an *All* tab it's OK for me...

This is exactly what I need! http://www.redmine.org/plugins/redmine_issue_detailed_tabs_time

But there are no guarantees on the term support of the solution, so I need directly from a box! Please!

#8 - 2013-03-11 14:19 - mark kalender

redmine_issue_detailed_tabs_time v 0.0.7 was done this weekend.
it now hides tabs if there is no activity for it. not sure if this is a desired effect.
it felt to clutered when an issue does not have much action on it.

Also im not sure about remembering user tab selection for next time it loads, but at the moment it always defaults to "All" tab. and the tabs only appear if something to put there

Mark, thak you 4 your work. If I understand correctly, there is a chance to include your implementation in the main package Redmine.
http://www.redmine.org/boards/3/topics/36787?r=36809#message-36809 Is this true?

Hey Pavel, ill have to look into it, ruby is very new to me but the changes are so simple its a great stepping stone for me to learn the language. Daniel or others would have to really vote this up for me to look into it.

in the mean time, be assured im a software engineer with a growing team, went from 2 ppl to 8 ppl so far in the last year, so having a good project management/Agile system is essential to me. my plugin and a few other plugins that im trying to make are very essential to our company usability over jirra and i believe in open source and welcome others to help better the plugins for you guys and our team. so as long as our team is here, i will keep these plugin growing and even re-fork old plugins that i find useful to streamlining our work here

#11 - 2013-03-11 19:38 - Pavel Lautsevich

Mark thank you and good luck! =)
