Description

The translation label "label_total" is used for total time (innumerable) and numerable values like the number of issues. I would suggest to split label_total into label_total_count and label_total_time. (or into label_total and label_total_time)

Translations for total time:

EN: label_total_time: total time
FR: label_total_time: temps total
DE: label_total_time: Gesamtzeit
RU: label_total_time: Общее время
