Redmine - Defect #13375

Inline Image formatting does not allow a file name with spaces

2013-03-06 19:04 - Anonymous

Status:	Closed		**Start date:**	
Priority:	Normal		**Due date:**	
Assignee:			**% Done:**	0%
Category:	Wiki		**Estimated time:**	0.00 hour
Target version:				
Resolution:	Duplicate		**Affected version:**	

Description

If you attach a file to a wiki which has spaces in the file name, then attempt to put the image inline using the following format: !"Image Name.png"! this does not work. It would be nice to not have to format all of the file names without spaces when doing inline images using attachments.

Have you tried replacing the space with %20 in your inline reference?
