Redmine - Feature #13394

New "code" button integrated into issue description toolbox

Description

It would be useful to have a "code" button integrated into issue description toolbox, next to "pre" button.

Toolbox.jpg
1. When you press "code" button you get the following tags added:

```
< pre >
< code class="" >
</ code >
</ pre >
```

It's so painful to type code tags everytime you have to attach code to a commentary.

Thank you,

Pedro
