Resolution:			
Description Hi, In gantt, By default the show page has status as filter. We get the assignee filter while clicking the 'Add filter' only. I need to show my gantt view with respect to "status" & "Assignee" by default. I tried to add the js code for assignee in query/_filters page but im not getting the output. Please anybody help me out?. Thanks, Poornima Dhanasekaran.

- Description updated

Corrected description.

#2 - 2013-03-18 14:19 - Daniel Felix

There is an issue in the pipe which let you save gantt filters like all other filters. Maybe this would solve your problem?

#3 - 2013-03-20 08:44 - poornima dhanasekaran

Danial,

Thanks for your reply. The actual gantt works with "status" as "open"(without filters). In my project, i wish to display the gantt chart with "status" as "all" & "assingnee" as me. i.e.) Change the default gantt view for status & assignee. Tried to modify the js in queries/_filters page. But i couldn't get the solution. Could you please help me?.

Thanks,
Poornima Dhanasekaran.
