

## Redmine - Patch #13589

### Wiki PDF export for 2 column tables

<b>Target version:</b>	2.6.0		
<b>Description</b>			
<p>The current PDF export for small tables is using only half of the page. As we currently do not have a way to supply any hints on the rendering using the full page is more convenient than for 2 or 3 column tables, then using half of the page.</p> <p>The patch simply changes the default setting of the tcpdf class (tcpdf.rb) by overriding it in the initialize of lib/redmine/export/pdf.rb</p>
