Redmine - Defect #13606

PDF and PNG export of Gantt loses issue numbers

2013-03-27 03:54 - Jason Palmer

Status:	New		**Start date:**	
Priority:	Normal		**Due date:**	
Assignee:			**% Done:**	0%
Category:	Gantt		**Estimated time:**	0.00 hour
Target version:				
Resolution:			**Affected version:**	2.3.0

Description

The PDF and PNG export of Gantt chart loses issue numbers, which makes it difficult to find and update issues when someone comments on a pdf or png copy of the gantt chart (Redmine 2.2.X, 2.3.0).

Also in the latest release (2.3.0), the relation lines (precedes/follows) do not appear on the pdf or png outputs.

Ultimately, we would like this tool to be able to replace MS Project. In the interim, it would be helpful to achieve an emailable/printable soft-copy of the content that appears on screen, without losing content or context.

(I´m very happy that "redmine_better_gannt" - plugin was implemented since Redmine 2.x; maybe anyone is able to realize this for exporting gantts)

In my opinion it would be a must to have the relation line in the export. For the issue numbers an option to select whether or not it should be included would be great.
