Target version:	4.1.0		
Description			
Currently thumbnail request with a size of 99 will provide an image of 50px. Currently thumbnail request with a size of 149 will provide an image of 100px. And one exception: thumbnail request with a size of 49 and less will provide an image of 100px. Provided image has to be bigger then requested and not smaller, for example: request from 1 to 50 -> 50px from 51 to 100 -> 100px from 101 to 150 -> 150px etc small patch that makes this change is attached
