<b>Description</b>			
Hi,			
My department hosts projects for many other departments within my company and we had to duplicate and customize the roles for each department.			
As they aren't "administrator" they can't have access to the permissions report, so they ask use to get a PDF to see how their profiles are set.			
We currently have 15 different roles and if we print the "Permissions report" it doesn't fit in the width. My idea was to export the table into a CSV and then clean the unwanted columns.			
Thanks			
Phil

Attached patch adds an "Also available in: CSV" link to "Permissions report". It applies to version 3.3

Great patch David, thank you.

Also is there any chance to have such functionality in form of macro?  
Maybe it would be easier to share the report with users on wiki.

On your Redmine root:

```
$ patch -p1 < issue_13767.patch
patching file app/controllers/roles_controller.rb
patching file app/helpers/roles_helper.rb
patching file app/views/roles/permissions.html.erb
```

Hello,

This patch does not seem to work on Redmine 4.1.1 ? Is there a way to adapt it ?

Thanks !

Hi, I am new to this network.

I tried the different patches and none of them enabled me the option to manage which role can export to CSV.

My redmine version is redmine 4.1.1.stable.
