

Redmine - Feature #13792

Fixing via git push should not break workflow

Description

We are running Redmine to 2.2.0.

Our typical workflow is New -> Assigned -> Fixed -> Verified -> Close

When we do push with git we run a hook to update bugs:

```
curl -sk "https://redmine.vo.com/sys/fetch_changesets?id=${id}&key=${key}"
```

Bugs that are referenced in the commit message are indeed Fixed.

However, we don't want this mechanism to break our workflow. I mean that an issue that is New or Verified should not become Fixed.

Am I making sense ?
