Description

Hi,

We have recently updated our Redmine installation from version 1.4.1 to latest version 2.3. In the csv export of the timelog, the fields Id, Tracker and Subject were headers of different columns. However, in version 2.3 these fields are displayed together as a header.

We usually use the issue id in order to obtain different relations with other files. Is there any possibility to display the Id as a single header?

Thanks in advance.

Best regards,
Diego

Thank you for your pointing.

#3 - 2013-04-20 10:54 - Toshi MARUYAMA

- Tracker changed from Feature to Defect

#4 - 2013-04-20 17:51 - Diego Álvarez

The patch in the issue #13618 doesn't work for me.

What I really want is to display in a column of the csv the IDs of the issues. An example could be:

- Task #001: [Subject]
- I need three different columns: Task | #001 | [Subject]

Best regards

Hi,

Have you got any comments or suggestions?

Thanks in advance.

Best regards
