

Redmine - Feature #13828

when users can only see their own issues; give watchers the ability to view issues they watch

Description hi, I am recent user of redmine, I want to implement a policy that implies each reporter (user) can see only his own issues. but I need watcher to be able to view issues they watch. by this way , we can keep privacy; an issue is viewed only by the person who created it and the watchers affected to it, of course administrators and developpers have the right to see all issues. thanks
