

Redmine - Defect #13840

Style issues by priority position, not id

2013-04-22 17:37 - Rocco Stanzione

Status: Closed	Start date:
Priority: Normal	Due date:
Assignee:	% Done: 0%
Category: Issues	Estimated time: 0.00 hour
Target version:	Affected version:
Resolution: Duplicate	
Description	
<p>This probably gets overlooked because people create priorities in the right order the first time, or use themes that leverage position_name, so it always looks right. If you reorder them, themes that style according to classes like priority-n have a bad time. In the IssuePriority model can we change this method definition like so?</p> <pre>def css_classes "priority-#{position} priority-#{position_name}" end</pre> <p>I'd submit a patch, but... for bonus points could we maybe move that process to github, where I can easily fork and submit pull requests?</p>

See issue #2071#note-7 (note-7).

This is a duplicate of #11880. The rationale of the change is outlined best in #2071.
