

## Redmine - Defect #13851

### Unthreade new mail message

2013-04-23 12:36 - pasquale [:dedalus]

<b>Status:</b>	Closed	<b>Start date:</b>	
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assignee:</b>		<b>% Done:</b>	0%
<b>Category:</b>	Email receiving	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>		<b>Affected version:</b>	2.3.0
<b>Resolution:</b>	Duplicate		
<b>Description</b>			
<p>I have updated redmine from previous (old) 1.4.0 to new 2.3.0. With new release, I have a problem with emails thread view: if I have old mail threaded (for example per bug [A]) and now someone update the bug [A], the new mail is orphaned and not threaded with others (old mails).</p> <p>This happens per a changed creation of message-id in email source. For the previous redmine release, when the bts send a mail for example from Date: Tue, 23 Apr 2013 11:23:09 +0200, I see that message-id is created as &lt;<a href="mailto:redmine.journal-22140.20130423112308@XXX.it">redmine.journal-22140.20130423112308@XXX.it</a>&gt;</p> <p>Now message-id is created as 22140.20130423092308 (-2 hours) and also references is created as 22140.20130423092308 (-2 hours) and cannot find originale message-id that is 22140.20130423112308 (+ 2 hours)</p> <p>Is this intentional or is a new behavior of timestamp.strptime routine?</p>

Is duplicate of Redmine - Defect #13888: Daylight savings causes inconsistenc...			<b>Closed</b>

### History

#### #1 - 2013-04-23 17:46 - pasquale [:dedalus]

The issue is related to new application.rb per option config.active\_record.time\_zone\_aware\_attributes;  
If i set config.active\_record.time\_zone\_aware\_attributes = false all work fine.

This is a major bug because in this situation, a message for the same bug posted the day after the daylight savings off isn't in the same thread of message sended for the same bug the day before!

#### #2 - 2013-05-06 09:05 - pasquale [:dedalus]

STRs (steps to reproduce):

1. move pc time to 30 march 2013, 10 AM
2. create a new bug: the first mail is sended to you
3. move pc time to 31 march 2013, 10 AM (when Europe starts Daylight Saving Time)
4. update the previously created bug: redmine seds a mail to you but the two mails are unthreaded

#### #3 - 2019-02-20 01:26 - Go MAEDA

- Related to deleted (Defect #13888: Daylight savings causes inconsistency of Message-Id in emails)

#### #4 - 2019-02-20 01:26 - Go MAEDA

- Is duplicate of Defect #13888: Daylight savings causes inconsistency of Message-Id in emails added

#### #5 - 2019-02-20 01:27 - Go MAEDA

- Status changed from New to Closed
- Priority changed from High to Normal
- Resolution set to Duplicate
