

Redmine - Patch #1393

FileSystem adapter

2008-06-06 11:34 - Paul Rivier

Status:	Closed	Start date:	2008-06-06
Priority:	Normal	Due date:	
Assignee:	Jean-Philippe Lang	% Done:	0%
Category:	SCM	Estimated time:	0.00 hour
Target version:	0.8		

Description

In some cases, one might want to use Redmine to manage a project that has no SCM repository associated with, but a simple directory in the filesystem (can be a shared directory for example).
The FileSystem adapter simply reflects a directory in the filesystem. No author, no revision, no diff etc., only raw files and directories.

Please find attached patch for that.

Revision 1508 - 2008-06-08 17:40 - Jean-Philippe Lang

Adds FileSystem adapter (patch #1393 by Paul R).

History

#1 - 2008-06-08 13:01 - Jean-Philippe Lang

I've just tested your patch. It looks to work fine and can be pretty useful indeed.

But some admins may not want users to be able to browse the whole filesystem of the remote host (a user allowed to manage repositories could create a FS repository that points to /).

I think we should provide a way for the admin to disable some of the "scm adapters".

#2 - 2008-06-08 17:36 - Jean-Philippe Lang

- Status changed from New to Closed

Patch committed in r1508 with slight changes in tests due to r1507.

#3 - 2008-06-08 17:54 - Thomas Lecavelier

Very useful feature. Never seen it before. Thank you.

#4 - 2013-02-22 01:20 - Youssef Boujraf

Dear,

I tried to enable filesystem and it works fine.

Just what about user rights.

Do you think you can add this features?

It will be great.

Best Regards,
Youssef
