### Description

Whenever I update from the issue list (ie, right click, change Status) I get an ISE. This didn't used to happen. I noticed it started around the 2.3.0 upgrade. I just upgraded to 2.3.1, and the same thing. Here's my info from rake about:

Looks like the error is AFTER the update because the required change is saved. From the error, obviously a non-int is being passed into PostgreSQL.

PostgreSQL 9.2.4

## History

### #1 - 2013-05-05 09:15 - Toshi MARUYAMA

- Subject changed from Internal Server Errors when updating from issue list to Internal Server Errors when bulk updating issues

### #2 - 2019-12-05 06:04 - Go MAEDA

- Status changed from New to Closed

- Resolution set to Cant reproduce

I cannot reproduce the problem in the latest trunk. I am closing this issue because the issue is very old and no one has reported the same issue in the past 6 years.

Please reopen this issue if you still experience the error with the latest version of Redmine.
