<b>Target version:</b>			
<b>Description</b>			
When trying to display run charts on redmine with pg backend, the query causes syntax error:			
ActiveRecord::StatementInvalid (PG::Error: ERROR: syntax error at or near "" LINE 1: ...op_key, DATE created_on from `journals`... ^ : select * from (select old_value as value, journalized_id as issueId, prop_key, DATE created_on from `journals` inner join journal_details on (journals.id = journal_id) inner join issues on (issues.id = journalized_id) where journalized_type = 'Issue' and property = 'attr' and (prop_key = 'estimated_hours' or prop_key = 'done_ratio') and project_id = 4 order by journals.id desc) a group by `issueId`, created_on, prop_key order by created_on desc): activerecord (3.2.13) lib/active_record/connection_adapters/postgresql_adapter.rb:1161:in `async_exec' activerecord (3.2.13) lib/active_record/connection_adapters/postgresql_adapter.rb:1161:in `exec_no_cache' activerecord (3.2.13) lib/active_record/connection_adapters/postgresql_adapter.rb:660:in `block in exec_query' activerecord (3.2.13) lib/active_record/connection_adapters/abstract_adapter.rb:280:in `block in log' activesupport (3.2.13) lib/active_support/notifications/instrumenter.rb:20:in `instrument' activerecord (3.2.13) lib/active_record/connection_adapters/abstract_adapter.rb:275:in `log' activerecord (3.2.13) lib/active_record/connection_adapters/postgresql_adapter.rb:659:in `exec_query' activerecord (3.2.13) lib/active_record/connection_adapters/postgresql_adapter.rb:1256:in `select' activerecord (3.2.13) lib/active_record/connection_adapters/abstract/database_statements.rb:18:in `select_all' activerecord (3.2.13) lib/active_record/connection_adapters/abstract/query_cache.rb:61:in `block in select_all' activerecord (3.2.13) lib/active_record/connection_adapters/abstract/query_cache.rb:75:in `cache_sql' activerecord (3.2.13) lib/active_record/connection_adapters/abstract/query_cache.rb:61:in `select_all' plugins/AgileDwarf/app/controllers/adburndown_controller.rb:57:in `show' ...			
I managed to get it corrected but am not sure if it's exactly compatible with agile dwarf logic. Here's patch:			
<pre>diff plugins/AgileDwarf/app/controllers/adburndown_controller.rb /tmp/adburndown_controller.rb 57c57 &lt; ActiveRecord::Base.connection.select_all("select * from (select old_value as value, journali zed_id as issueId, prop_key, DATE(journals.created_on) created_on from journals inner join journal _details on (journals.id = journal_id) inner join issues on (issues.id = journalized_id) where jou rnalized_type = 'Issue' and property = 'attr' and (prop_key = 'estimated_hours' or prop_key = 'don e_ratio') and #{restcondchanges} order by journals.id desc) a group by issueId, created_on, prop_k ey, a.value order by created_on desc").each{ row  @changes &lt;&lt; row} --- &gt; ActiveRecord::Base.connection.select_all("select * from (select old_value as value, journali zed_id as issueId, prop_key, DATE(journals.created_on) created_on from `journals` inner join journ al_details on (journals.id = journal_id) inner join issues on (issues.id = journalized_id) where j ournalized_type = 'Issue' and property = 'attr' and (prop_key = 'estimated_hours' or prop_key = 'd one_ratio') and #{restcondchanges} order by journals.id desc) a group by `issueId`, created_on, pr op_key order by created_on desc").each{ row  @changes &lt;&lt; row} 80c80</pre>
