## Redmine - Defect #14038

# Ordered/unordered lists inside table cell are mangled

2013-05-13 12:32 - Mikhail Sviridov

Status:	Reopened	Start date:	
Priority:	Normal	Due date:	
Assignee:	Jean-Philippe Lang	% Done:	0%
Category:	Text formatting	Estimated time:	0.00 hour
Target version:	Candidate for next major release		
Resolution:	Fixed	Affected version:	
Description			
Here is an example:			
test name		test	
test formatting		<b>bold</b> <u>underlined</u> striked out <i>italic</i> code <u>www.redmine.org</u> coffee.jpg <u>Wiki page link</u>	
test multiline		bold	
		underlined striked out <i>italic</i> code Wiki page link www.redmine.org coffee.jpg	
		preformatted te with indents	
test numbered list		numbered list: # item 1 # item 2	
test bulleted list		bulleted list: * item 1 * item 2	
record after bad row	vs	some data	
	h "test numbered list" and "test bulleted list n't use quotations inside of table cell as we

## Associated revisions

## Revision 11845 - 2013-05-14 18:29 - Jean-Philippe Lang

Fixed that ordered/unordered lists inside table cell are mangled (#14038).

## Revision 11866 - 2013-05-18 11:31 - Jean-Philippe Lang

Removed debug log (#14038).

## History

## #1 - 2013-05-13 12:37 - Mikhail Sviridov

Here is modified test for lists with subitems:

test numbered list	numbered list: # item 1 # item 2 ## subitem 2.1 ## subitem 2.2 # item 3
test bulleted list	bulleted list: * item 1 * item 2 * <b>subitem 2.1</b> * subitem 2.2 * item 3

#### #2 - 2013-05-14 18:34 - Jean-Philippe Lang

- Subject changed from can't use bulleted and numbered lists inside table cell to Ordered/unordered lists inside table cell are mangled

- Status changed from New to Closed
- Assignee set to Jean-Philippe Lang
- Target version set to 2.4.0
- Resolution set to Fixed

The fact that lists are mangled in table cells is fixed in r11845. But they won't be formatted as ul/ol as Redcloth does not support this feature.

#### #3 - 2013-05-15 05:08 - Mischa The Evil

#### - Status changed from Closed to Reopened

The example given by Mikhail in note-1 still doesn't render properly.

```
|test numbered list|numbered list:
# item 1
# item 2
## subitem 2.1
## subitem 2.2
# item 3|
|test bulleted list|bulleted list:
* item 1
* item 2
** subitem 2.1
** subitem 2.2
* item 3|
```

#### now renders as:

```
table>

top

top<
```

So it looks like the nested ul items aren't parsed correctly. I've written an additional test case based on the one in r11845 which will fail at the moment:

```
def test_tables_with_lists_with_nested_items
  raw = <<-RAW
This is a table with lists with nested items:
|test numbered list|numbered list:
# item 1
# item 2
## subitem 2.1
## subitem 2.2
# item 3|
|test bulleted list|bulleted list:
* item 1
* item 2</pre>
```

```
** subitem 2.1
** subitem 2.2
* item 3|
RAW
   expected = <<-EXPECTED
This is a table with lists with nested items:
test numbered list
   numbered list:<br /># item 1<br /># item 2<br />## subitem 2.1<br />## subitem 2.2<br /># item 3
 test bulleted list
   bulleted list:<br />* item 1<br />* item 2<br />** subitem 2.1<br />** subitem 2.2<br />* item 3
 EXPECTED
   assert_equal expected.gsub(%r{\s+}, ''), to_html(raw).gsub(%r{\s+}, '')
 end
```

I think that this fact should be subsequently reported at the Redcloth development site as feature requiest if nobody had done it earlier. It would be great to see this feature in Redmine.

This relies on issue <u>#6269</u>. Redmine is still using (a heavily patched) RedCloth 3.0.4. All new features for RedCloth are integrated only into RedCloth 4.x.

A quick search reveals that there are already requests to format ul/ol lists inside table cells e.g. http://jgarber.lighthouseapp.com/projects/13054-redcloth/tickets/249.

#### #6 - 2013-10-13 10:02 - Jean-Philippe Lang

- Target version changed from 2.4.0 to Candidate for next major release

2.4 feature freeze

#### #7 - 2013-10-14 09:14 - Toshi MARUYAMA

- Related to Feature #6269: RedCloth 4 support added

#### #8 - 2014-03-15 09:50 - Stephan Brönnimann

The fix has the unpleasant side-effect, that trailing space of a row leads to wrong rendering:

| 1.1 | 1.2 | | 2.1 | 2.2 | <-space here | 3.1 | 3.2 | | 4.1 | 4.2 |

renders as:

s:	1.1	1.2
	2.1	2.2
	3.1	3.2
	4.1	4.2

### #9 - 2014-10-29 09:47 - Toshi MARUYAMA

- Related to Defect #18223: Table renders wrong if a trailing space is after | symbol added

#### #10 - 2015-08-18 11:42 - Jens Krämer

I attached a patch for the trailing whitespace problem to #18223.

## #11 - 2022-06-27 11:34 - Michael Howitz

It seems that lists in tables are still not rendered as such. I there any chance to get this fixed?

BTW: Why does redmine.org use a Redmine version from 2014 for its own issue tracker?
