

Redmine - Defect #1409

Prevent adding of files if no version is defined

2008-06-09 14:00 - Andreas Deininger

Status:	Closed	Start date:	2008-06-09
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Attachments	Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:			
Description			
How to reproduce: For a project, that does not have any versions defined, try to add a new file: http://forge.stiegele.eu/projects/add_file/my_project Choose a file and click the "Add"-button. You are redirected to the file list, though no file was added. This is confusing. Proposed solution: Add a validation checking whether a version was defined. In case there is no version defined, show an appropriate error message while trying to add a file. Or simply block access to the submit form, showing a message: Prior to submitting files, you have to define a version first (or so).

History

#1 - 2008-06-09 15:14 - Anonymous

Yep, we've been hit by this.

#2 - 2008-07-28 04:21 - Matt Haley

- File *notice_on_attach_without_version_07262008_r704.diff* added

Here is a patch that displays a notice at the top of the page if no versions have been created in the project. Created against [r1704](#).

#3 - 2008-12-31 13:05 - Mischa The Evil

- Category set to *Attachments*

- Status changed from *New* to *Closed*

This is fixed/implemented in 0.8.1, thus issue closed...
