<b>Description</b>	
<p>IBM Lotus Notes is a rich client. After installation it registers in operating system additional protocol "notes"</p> <p>An URI looks like notes://SERVER/442579BB0045C177/0/250334F0B767F79B44257B8000199EEB</p> <p>As normal every browser handles this URI well. After the click Lotus Notes window is opened, but in Redmine it looks like plain text in both ways.</p> <p>notes://SERVER/442579BB0045C177/0/250334F0B767F79B44257B8000199EEB [[notes://SERVER/442579BB0045C177/0/250334F0B767F79B44257B8000199EEB]]</p>
