Target version:	0.8			
Resolution:	Fixed		**Affected version:**	

Description

Acts as searchable verify that the project_id and created_on columns exists when not providing project_key and date_column options in the model defined to be searchable.
When one of those options is not set, an error is raised when the corresponding column (or the entire table) doesn't exists by loading the model.

I think that loading time is not the right moment for doing this verification. None of the rails mechanisms prevent a model to be loaded because of missing column in the database.

This defect causes me problem during initial rake db:migrate when loading a conf that loads some models that are searchable.

Here is a patch that solves the problem.

Associated revisions

Revision 1682 - 2008-07-20 19:31 - Jean-Philippe Lang

Fixed: searchable model can't be loaded if table is not yet created (#1421).

History

#1 - 2008-07-20 19:29 - Jean-Philippe Lang

- *Category set to Search engine*

- *Status changed from New to Closed*

- *Target version set to 0.8*

- *Resolution set to Fixed*

Fixed in r1682.
