Redmine - Defect #14338

svn: repository statistics issue when user names only differ in case

2013-06-24 13:59 - Dennis Wouters

Status:	Closed		**Start date:**	
Priority:	Low		**Due date:**	
Assignee:	Jean-Baptiste Barth		**% Done:**	0%
Category:	SCM		**Estimated time:**	0.00 hour
Target version:				
Resolution:	Wont fix		**Affected version:**	2.2.2

Description
I have SVN repository to which I commit from my Windows and Linux account. On one system my username is lowercase, on the other uppercase. When requesting the repository statistics, only the upper case version is shown in the 'commits per author' graph. (This is fine!) However, my user has a 'revisions' associated with it, but no 'changes' bar. (While it should be the largest bar.) (The other users in the graph appear ok, with both bars showing.)

- Assignee set to Jean-Baptiste Barth

- Resolution set to Wont fix

I don't think homonyms who differ in case should be merged by default, that's an edge case we shouldn't cover if we want to keep the behaviour clean and predictible.

However I plan to work on #13487 these days, so when it's done you can map both usernames to your account and Redmine will display only one unified bar for both accounts. I hope it will be OK for you.
