Redmine - Feature #14397

Gantt sorting as a configurable setting

2013-07-04 15:46 - Michael Heinze

Description

As of 2.4.0 the issues in the Gantt will be sorted by start date instead of lft/rgt (implementation of #7335).

In my opinion - as an extension of that - it would be very helpful if there was an option in the Redmine settings where the user/admin can configure which kind of sorting shall be used to display the issues in the Gantt (either by lft/rgt or by start date).

May it be possible to implement that?

One reason why we should not disable the sorting by lft/rgt is that some day we could extend Redmine by a manual sorting functionality based on the lft/rgt values (the awesome nested sets already offer the "move_left" and "move_right" methods which could be used for this).

Why not using the existing sorting-system for tickets also for gantt? It's very powerful as one can even save queries.

Any progress on this one?

#7 - 2013-10-13 10:02 - Jean-Philippe Lang

- Target version changed from 2.4.0 to Candidate for next major release

2.4 feature freeze

#8 - 2013-10-13 10:22 - Toshi MARUYAMA

- Target version changed from Candidate for next major release to 2.4.0

I think this feature need to include in 2.4.0 because #7335 changed sorting.

#9 - 2013-11-10 10:44 - Jean-Philippe Lang

- Target version deleted (2.4.0)

Yes, that *would* be usefull. For now, I prefer to have only one sorting method.
