<b>Resolution:</b>			
<b>Description</b>			
Doing an upgrade under Windows from a working 2.1.2 install to 2.3.2.			
The command 'bundle install --without test development rmagick' is failing due to mySQL2 gem trying to install version 0.3.13.			
It fails with the error 'Gem::Installer::ExtensionBuildError: ERROR: Failed to build gem native extension.'			
This wasn't noticed when upgrading to 2.3.1 (for testing).			
Changing the gemfile to specifically point to version "0.3.11" rather than "~> 0.3.11" solved the issue for me.			
Seems that there is an issue with the gem '0.3.13' which is bugging the install.
