

## Redmine - Defect #14792

### Don't add a display name and extra angle brackets in List-Id header field

2013-08-28 11:19 - Jan Niggemann (redmine.org team member)

|  |                     |                          |            |
|--|---------------------|--------------------------|------------|
| <b>Status:</b>   | Closed              | <b>Start date:</b>       |            |
| <b>Priority:</b>   | Normal              | <b>Due date:</b>         |            |
| <b>Assignee:</b>   | Go MAEDA            | <b>% Done:</b>           | 0%         |
| <b>Category:</b>   | Email notifications | <b>Estimated time:</b>   | 0.00 hour  |
| <b>Target version:</b>   | 4.1.0               | <b>Affected version:</b> |            |
| <b>Resolution:</b>   | Fixed               |                          |            |
| <b>Description</b>   |                     |                          |            |
| Continued from here: <a href="http://www.redmine.org/boards/1/topics/39232">http://www.redmine.org/boards/1/topics/39232</a>   |                     |                          |            |
| If Setting.mail_from already contains a (valid) address like "Ticket System < <a href="mailto:DoNotReplies@mydomain.com">DoNotReplies@mydomain.com</a> >", then it's wrong to insert angle brackets in this line <a href="http://www.redmine.org/projects/redmine/repository/revisions/11988/entry/trunk/app/models/mailer.rb#L389">http://www.redmine.org/projects/redmine/repository/revisions/11988/entry/trunk/app/models/mailer.rb#L389</a> |                     |                          |            |
| It creates List-Ids of the form "<Ticket System < <a href="mailto:DoNotReplies@mydomain.com">DoNotReplies@mydomain.com</a> >>", which, if I understand correctly, are not RFC compliant: <a href="http://www.ietf.org/rfc/rfc2919.txt">http://www.ietf.org/rfc/rfc2919.txt</a>   |                     |                          |            |
| See also <a href="#">#10888</a> and propped patch <a href="#">#13359</a>   |                     |                          |            |
| <b>Related issues:</b>   |                     |                          |            |

#### Associated revisions

##### Revision 17873 - 2019-02-16 23:45 - Go MAEDA

Test that List-Id header field does not include display name and extra angle brackets (#14792).

Patch by Go MAEDA.

#### History

##### #1 - 2013-09-04 11:36 - Toshi MARUYAMA

- Related to Feature #13359: Add project identifier to List-Id header in notification emails for better Gmail filtering added

##### #2 - 2019-02-11 13:38 - Go MAEDA

- Related to Defect #30785: Mail handler does not ignore emails sent from emission email address if Setting.mail\_from includes display name added

##### #3 - 2019-02-13 04:05 - Go MAEDA

- File fix-14792.diff added

- Priority changed from Low to Normal

- Target version set to 4.0.2

You can fix this issue with the attached patch.

##### #4 - 2019-02-14 03:05 - Go MAEDA

The patch attached in [#5913#note-17](#) also fixes this issue. It is unnecessary to merge [fix-14792.diff](#) if that patch is merged.

##### #5 - 2019-02-16 00:54 - Go MAEDA

- Related to Feature #5913: Authors name in from address of email notifications added

##### #6 - 2019-02-16 01:01 - Go MAEDA

- Assignee set to Go MAEDA

- Target version changed from 4.0.2 to 4.1.0

- Resolution set to Fixed

Fixed in [r17870](#) along with [#5913](#).

I will commit the following test later.

```

#7 - 2019-02-16 15:45 - Go MAEDA

Adding a test method is too much. We can test that display name and other stuff is not included by adding only one line.

#8 - 2019-02-16 23:57 - Go MAEDA

- Subject changed from Don't add angle brackets in List-Id / mailer.rb to Don't add a display name and extra angle brackets in List-Id header field
- Status changed from New to Closed

Updated the test to catch this issue ([r17873](#)).
