

Redmine - Defect #15227

Custom fields in issue form - splitting is incorrect

2013-10-30 11:28 - eyal R

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:	Jean-Philippe Lang	% Done:	0%
Category:	Custom fields	Estimated time:	0.00 hour
Target version:	2.4.0	Affected version:	
Resolution:	Fixed		
Description			
I think there is a bug in the custom fields rendering:			
app/views/issues/_form_custom_fields.html.erb			
<pre><div class="splitcontent"> <div class="splitcontentleft"> <% i = 0 %> <% split_on = (@issue.custom_field_values.size / 2.0).ceil - 1 %> <% @issue.editable_custom_field_values.each do value %> <p><%= custom_field_tag_with_label :issue, value, :required => @issue.required_attribute?(value. custom_field_id) %></p> <% if i == split_on -%> </div><div class="splitcontentright"> <% end -%> <% i += 1 -%> <% end -%> </div> </div></pre>			
I think the line			
<pre><% split_on = (@issue.custom_field_values.size / 2.0).ceil - 1 %></pre>			
should be			
<pre><% split_on = (@issue.editable_custom_field_values.size / 2.0).ceil - 1 %></pre>			
Since the calculation should be according to the custom fields that are going to be shown.			
Thanks.
