Description
The current 'awesome_nested_set' plugin is outdated and lacks of important improvements such as scoped deletion. This plugin could be removed from the repository and be replaced by the 'awesome_nested_set' gem (http://rubygems.org/gems/awesome_nested_set).

awesome_nested_set 2-1-stable was heavy refactored and has regression (Pull request 235).

As I described at #14534#note-10, master branch requires Rails 4.0.

awesome_nested_set have not released 3.0.0 for Rails 4.0.

awesome_nested_set refused Rails4 DEPRECATION WARNING for 2.1.6. (Pull request 230/231/232)

If awesome_nested_set will not release 3.0.0 for Rails 4.0 before Redmine Rails 4.0 porting,
we need to import awesome_nested_set 2.1.6 and modify again.
