Resolution:	Invalid		

Description

Hi,

I trying to migrate database from v.2.1.4 to v.2.4.1 and when i had click to 'activity', 'issues', 'gant diagramm' and 'settings' i got an error 500.

It's strange, because with db from v.2.4.1 it's working correctly and when i had installed the Redmine v.2.4.1 and trying to migrate the database from latest Redmine version i had got an error.

Please clarify, it's very strange for me.

Thank you.

The log is

```

Hi,

This file is also have 'attr_protected :fields_bits'

I had used the latest Redmine for install, only database from older version.
