Redmine - Feature #1565

Custom query on My page

2008-07-03 09:59 - Andrea Maleci

Status:	Closed		**Start date:**	2008-07-03
Priority:	Normal		**Due date:**	
Assignee:	Jean-Philippe Lang		**% Done:**	0%
Category:	My page		**Estimated time:**	0.00 hour
Target version:	3.4.0			
Resolution:	Fixed			

Description

Should be nice to add on my page folder a saved custom query.

AFAICS: nothing (yet)...

#3 - 2011-01-05 22:42 - James Rowe

I agree. Should be able to have custom queries as a droppable block on my page.

Take the look and feel of 'issues I'm watching' and put in issues returned from a custom query.

+1

#4 - 2011-01-07 00:37 - Landon Harsh

There is a plugin called "MyPage custom queries" that will do this, but it does not honor the columns from the query which I think is critical.

+1 for this with the columns from the query honored.

#5 - 2011-01-18 11:24 - Irfan Adilovic

+1

I don't have a use for closed issues in the watched and reported issues queries; I'd like to customize them or replace them with custom ones.

#6 - 2011-01-24 12:34 - Tobias Verbeke

+1

would significantly reduce clicking around to have a quick overview when starting to work; this feature request was the first one team members made since the introduction of redmine for our project management

#7 - 2011-01-27 01:11 - Milan Stastny

MyPage custom queries is my quick creation withouth much of a testing and feedback from anybody, so if you try it out and find out that it works close to your liking I'll be more than happy to finish it. Just let me know, on github/mail, anywhere.

#8 - 2011-01-27 18:05 - Landon Harsh

I am utilizing the MyPage custom queries plugin. I thought it was going to do exactly what I wanted, but I was a bit disappointed for one reason. It does not honor the specifics of the query, displayed coloumns, sort order, those kinds of things. If it did honor all parameters of the query, this would be a perfect solution for my particular situation.

I appreciate what you have done so far, it is a great start! Thank you.

This is clearly a much needed feature. Shouldn't this ticket's priority be upped? Also, could someone with required permisssions add the tickets mentioned in "duplicates" from comment 9 to the "related" for this ticket?

From looking at all these tickets, a view block that allows you to display one of your saved reports would do the trick, no? Even better, if you could "instantiate" more than one of those view blocks, as some people want to see several reports simultaneously.

+1. This is a very demanded feature in our company.

#38 - 2013-03-26 07:33 - Leos Prikryl

This plugin https://github.com/Undev/redmine_my_page_queries works fine with Redmine 2.3.0.

#39 - 2013-03-26 14:08 - Dipan Mehta

Leos Prikryl wrote:

> This plugin https://github.com/Undev/redmine_my_page_queries works fine with Redmine 2.3.0.

This is a great plugin and works! This really transforms the "my page" experience. However, I saw one limitation. The regular query page allows you to sort the issue list based on different fields where as here they are only based on issue ID. Is it possible to provide sort order?

Thanks for the plugin.

#40 - 2013-03-26 14:46 - Leos Prikryl

This is really a much wanted feature that would lift up redmine to become similar to thise kanban-like system like trello, kanbanize, targetprocess and so on.

What those system are good at is to provide the "kanban board" column view of issues.

if we just implement this feature with a flexible multi-column/grid layout, you have basically got a very powerfull and flexible board anybody can share.

This would make also several scrum/kanban redmine plugins redundant and obsolete. Users would not need to feel the need to move to other modern kanban systems.

#59 - 2014-09-10 16:06 - Youssoupha Sambe

+1
This feature is vital for Redmine, for it just increase rentability of the application.

The only available plugin for this is not "complete" as it just allow query editing.

Furthermore there is no point, I think, having a table and not be able to sort it and/or edit the columns using the UI.

Personally I need it to allow users to see the issues that are assigned to them with due date, and I need the widget to be editable like the table in issue tab.

#60 - 2014-10-17 17:10 - Olivier Houdas

+1
People in our company also request me (their Redmine admin) to be able to use their own filter as a Mypage component.

Yes we need that!

#63 - 2015-02-09 13:39 - Jens Krämer

- File master_1565.diff added

- File 2.6_stable_1565.diff added

Hi,

we just built that here at Planio, and we'd really like to see this make its way into Redmine Core.

This patch enables users to add any number of custom queries to their 'My page'. For the sake of consistency the number of issues shown for each query is limited to 10, as is the case with the pre-defined issue blocks. Going further and to make this even more useful, it would be nice to have a way to give users the ability to change this limit either globally or per block.

Attached you find patches for current master and 2.6-stable branch.

Cheers,
Jens

#64 - 2015-02-10 21:03 - Jan from Planio www.plan.io

- Assignee set to Jean-Baptiste Barth

Jean-Baptiste, are you still looking for "committable" patches? This one is a bit lengthy, but in my opinion it's a great improvement for the My Page section and telling by the +1's here on redmine.org and from our clients at Planio, I think it would be well received.

#65 - 2015-02-10 23:10 - Tobias Fischer

Awesome, thank you Jens! :)

I did basic tests with latest 2.6 branch and can confirm the 2.6_patch works well!

Would be great if we could have this implemented in the next redmine version...

#66 - 2015-04-14 22:51 - Le Distordu

+1 High priority !!!

#67 - 2015-05-07 09:42 - Chet Wang

I'm using redmine 3.0.1, but this feature is still missing....
[Jens Priesen](#) Krämer
Is your patch available to redmine v3? or could you please provide an v3 compatible patch?

#68 - 2015-05-07 10:14 - Chet Wang

Could someone re-assign this issue to Jean-Philippe Lang? It seems that Jean-Baptiste Barth hasn't been logging in redmine.org for months!

Its already registered : http://www.redmine.org/plugins/redmine_my_page

#76 - 2017-02-27 22:46 - Marius BĂLTEANU

- File rm_1565_issues_from_custom_query.patch added

I made a patch that implements a new block which returns the issues from a selected query. For consistency with the other issue blocks, I chose to limit the results to 10 and use the same columns. I think that customising the number of results and the columns displayed should be made in other ticket and should be available for all issue blocks.

#77 - 2017-03-01 14:58 - Go MAEDA

- File my-page-query-setting.png added

- File my-page-query.png added

- Target version set to Candidate for next major release

These are screenshots of Marius BALTEANU's patch attached on [#1565#note-76](#).

#78 - 2017-03-05 03:27 - Go MAEDA

- Assignee deleted (Jean-Baptiste Barth)

- Target version changed from Candidate for next major release to 3.4.0

Many users have been waiting for this feature (40 "+1"s, 13 duplicate issues).
Setting target version to 3.4.0.

#79 - 2017-03-09 20:14 - Jean-Philippe Lang

Thanks for the patch Marius. I think it would make sense to render the query with its column (instead of the default one used for other lists on "my page"), what do you think?

#80 - 2017-03-09 21:05 - Marius BĂLTEANU

It'll be great to render the query with its column. That means we should use the list partial instead of the list_simple or to modify the list_simple to support custom columns. Another benefit of list partial is the grouping feature.

Please let me know which solution sounds better for you.

#81 - 2017-03-09 21:37 - Jean-Philippe Lang

I've just made a few changes to the "list" partial in order to use local variables, we should be able to use it.

#82 - 2017-03-09 21:39 - Marius BĂLTEANU

Thanks, I'll update the patch.

#83 - 2017-03-10 09:24 - Marius BĂLTEANU

- File rm_1565_issues_from_custom_query.patch added

Here it is the updated patch. Issues are now rendered using the "list" partial with these features: custom columns, sorting and grouping.

The number of issues displayed are still limited to 10. We should change this too and make it configurable in the block?

#84 - 2017-03-16 23:44 - Jean-Philippe Lang

- Status changed from New to Closed

- Assignee set to Jean-Philippe Lang

- Resolution set to Fixed

Thanks Marius, I've reworked the patch a bit after I made more changes to the management of "My page". I've also implemented the possibility for some blocks to be displayed multiple times, with different settings. So it's now possible:

- to select the columns and sort order of existing issue lists (assigned, reported and watched issues)
- to display up to 3 custom queries

I think we can close it.

#85 - 2017-03-17 18:46 - Marius BĂLTEANU

Thanks Jean-Philippe Lang! I tested all of your changes regarding "My page" and they looks very good. I'm impressed :)

I have only one small observation, it is ok to let the user to add the same custom query multiple times?

Also, I'm thinking now that could be quite useful to add two new options for each block:
- refresh the block: for users who want to refresh only one block from my page
- full screen: for users who want to view a block on full screen.
For both of them I'll open a new issue when I've the patches ready.

#86 - 2017-08-10 14:36 - Martin Blom

Why only 3 custom queries?

#87 - 2017-08-18 10:29 - Martin von Wittich

I just stumbled over that 3 custom query limit too. I would very much like to use more queries :(

#88 - 2017-08-29 16:27 - Toshi MARUYAMA
