<b>Description</b>			
<p>I added a relation to another ticket to an issue and the notification mail was sent out to users assigned to the task / watching the task.</p> <p>Inside the mail there is a link to the ticket that tells me that a new relation was added to the issue. the url is not fully qualified, it is relative /issues/123 should be <a href="http://(...)/issues/123">http://(...)/issues/123</a></p> <p>This causes that a click at the link does not open the issue inside the browser because the url is incorrect.</p>

I added a relation to another ticket to an issue and the notification mail was sent out to users assigned to the task / watching the task.

Redmine core does not have such feature.

I have no plugin installed for this - so redmine HAS this feature ;-)

I pointed at the dropdown that allows to create relations to other tickets (blocked by, ....) adding such a relation sends out a email notification.
