<b>Description</b>			
Redmine trunk / mysql / svn			
The links to a specific revision of a file are escaped (apache2 proxy balancer blocks them and says file does not exist). Example:			
<a href="http://server/repositories/entry/id/vendor%2Fplugins%2Fhaml%2Finit.rb">http://server/repositories/entry/id/vendor%2Fplugins%2Fhaml%2Finit.rb</a>			
instead of			
<a href="http://server/repositories/entry/id/vendor/plugins/haml/init.rb">http://server/repositories/entry/id/vendor/plugins/haml/init.rb</a>			
<pre>--- app/views/repositories/revision.rhtml      (revision 1643) +++ app/views/repositories/revision.rhtml      (working copy) @@ -50,7 +50,7 @@   &lt;% if change.action == "D" -%&gt;     &lt;%= change.path -%&gt;   &lt;% else -%&gt; -   &lt;%= link_to change.path, :action =&gt; 'entry', :id =&gt; @project, :path =&gt; without_leading_slash( change.relative_path), :rev =&gt; @changeset.revision -%&gt; +   &lt;%= link_to change.path, :action =&gt; 'entry', :id =&gt; @project, :path =&gt; to_path_param(without_ leading_slash(change.relative_path)), :rev =&gt; @changeset.revision -%&gt;   &lt;% end -%&gt;   &lt;%= "#{change.revision}" unless change.revision.blank? %&gt;&lt;/td&gt; &lt;td align="right"&gt;</pre>
