

Redmine - Defect #16

These files should be moved out of revision control...

2007-03-13 19:50 - Chris Grant

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:			
Description			
Because temporary and log files shouldn't be under version control...			
[DONE] Remove log files and ignore in future: svn remove log/* svn commit -m "Removed all files within log/"			
<pre>svn propset svn:ignore "*" log/ svn update log/ svn commit -m "Ignoring all files within log/"</pre>			
[DONE] Remove temporary files and ignore in future: svn remove tmp/* svn commit -m "Removed all files within tmp/"			
<pre>svn propset svn:ignore "*" tmp/ svn update tmp/ svn commit -m "Ignoring all files within tmp/"</pre>			

Because files in the files/ directory shouldn't be under version control...			
[DONE] Remove any files within files/ directory and ignore in future: svn remove files/* svn commit -m "Removed all files within files/"			
<pre>svn propset svn:ignore "*" files/ svn update files/ svn commit -m "Ignoring all files within files/"</pre>			

Because everyone has their own database.yml and schema.rb files...			
[TODO] Move config/database.yml to template-like config/database.yml.example: svn move config/database.yml config/database.yml.example svn commit -m "Moved database.yml to database.yml.example to act as a tempate"			
[TODO] Ignore config/database.yml when the user creates it: svn propset svn:ignore "database.yml" config/ svn update config/ svn commit -m "Ignoring config/database.yml"			
[TODO] Remove db/schema.rb and ignore in future: svn remove db/schema.rb svn commit -m "Removed db/schema.rb"			
<pre>svn propset svn:ignore "schema.rb" db/ svn update db/ svn commit -m "Ignoring db/schema.rb"</pre>			

Because some people have to make changes to dispatch files...			

[TODO] Move public/dispatch.* to public/dispatch.*.example:
svn move public/dispatch.rb public/dispatch.rb.example
svn move public/dispatch.cgi public/dispatch.cgi.example
svn move public/dispatch.fcgi public/dispatch.fcgi.example
svn commit -m "Moved public/dispatch.* to public/dispatch.*.example"

[TODO] Ignore public/dispatch.* files:
svn propset svn:ignore "dispatch.*" public/
svn update public/
svn commit -m "Ignoring public/dispatch.*"

If there's anything I've missed, just kick in a comment.

Thanks,
-Chris
