

Redmine - Defect #16161

Parent task search and datepicker not available after changing status

2014-02-24 14:20 - Daniele Pedroni

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:	Jean-Philippe Lang	% Done:	0%
Category:	Issues	Estimated time:	0.00 hour
Target version:	2.4.4	Affected version:	2.4.2
Resolution:	Fixed		

Description

I played a bit with read only field for trackers and users throughout all my Redmine setup, but now I found out a problem. When I try to create a new issue, only Tracker, Status and Parent Task fields are visible, and Parent Task has its Magnifier lens image in it, so if I type something in the field, it starts the contextual search.

Tracker *

Status * Parent task

Files Nessun file selezionato (Maximum size: 20 MB)

But then, when I change the status and the page is redrawn as per specific tracker/issue, Parent Task loses its Magnifier and the capability of search with it; same thing for due date and start date datepicker, not available at all.

Tracker *

Subject *

Description

Status * Parent task

Priority * Start date

Assignee Due date

Finally, if I create the issue and then try to update it, both Parent Task search and datepicker are back as usual.

Any idea?

My Redmine installation comes from Bitnami stack 2.4.2-0, containing:

- Redmine 2.4.2
- Apache 2.4.7
- ImageMagick 6.7.5
- MySQL 5.5.34
- Subversion 1.8.4
- Git 1.8.3
- Ruby 1.9.3-p484
- Rails 3.2.16
- RubyGems 1.8.12

and plugins:

- extended fields 0.2.2
- projects table plugin 0.0.4
- DMSF 1.4.7 stable
- Redmine Multi Column Custom Fields plugin 0.0.1
- Redmine Tracker Control plugin 1.0.8

Closed**Associated revisions****Revision 12941 - 2014-02-28 13:52 - Jean-Philippe Lang**

Always load formatter scripts for when the description is read-only on page load (#16161).

Revision 12942 - 2014-02-28 13:53 - Jean-Philippe Lang

Merged r12941 (#16161).

Revision 12943 - 2014-02-28 13:53 - Jean-Philippe Lang

Merged r12941 (#16161).

History**#1 - 2014-02-28 13:54 - Jean-Philippe Lang**

- Status changed from New to Closed
- Assignee set to Jean-Philippe Lang
- Target version set to 2.4.4
- Resolution set to Fixed

This was due to the fact that the description field was read-only when the page is loaded. It's fixed in [r12941](#), thanks for pointing this out.

#2 - 2014-02-28 14:15 - Daniele Pedroni

- Status changed from Closed to Reopened

Sorry JPL,

following your explanation I tried disabling read only attribute for Description field, in order to get the scripts back without having to wait for 2.4.4 release, but with no luck: I see also Description before changing status, but the datepicker and contextual search for Parent task are still missing. Even with all global fields without read only property (I left other custom fields as read only, but I don't think it could be related), the problem is present.

I didn't restart Redmine process after workflow modification, but I don't understand why this should be necessary... Are you sure your patch will work in any condition?

Thank you for your great support.

#3 - 2014-02-28 17:03 - Jean-Philippe Lang

- Status changed from Reopened to Needs feedback

Well, I was able to reproduce with the configuration as in your first screenshot and [r12941](#) fixed it. Tested with Chrome and Firefox.

Maybe a plugin issue, please try this out without any plugin.

#4 - 2014-03-02 10:32 - Jean-Philippe Lang

- Status changed from Needs feedback to Closed

I'm closing it. Please open a new ticket if you find another case that breaks.
